SUMMARY

Backend Developer and Business Information Systems (BIS) graduate (Al Shorouk Academy, 2026) with hands-on experience in PHP, Laravel, MySQL, SQL, Python, and RESTful API development. Skilled in designing and optimizing relational databases, implementing secure authentication, unit testing (PHPUnit), dependency management (Composer), Redis caching, and API documentation. Experienced in building scalable, production-style web applications through internships and real-world projects, with strong analytical, problem-solving, and teamwork skills.

EDUCATION

Bachelor of Business Information Systems (BIS)

Graduation: 2026

Al Shorouk Academy | GPA: 3.5 / 4.0

PROFESSIONAL EXPERIENCE

PHP Web Developer Trainee — Createivo

08/2025 – 01/2026

El Mansoura Branch

- Developed dynamic backend web applications using PHP, Laravel, and MySQL.
- Designed, optimized, and maintained efficient relational database schemas.
- Implemented server-side logic and integrated web functions to improve application performance.
- Wrote unit tests with PHPUnit to validate core application logic and reduce regression bugs.
- Managed project dependencies using Composer for consistent, reproducible environments.
- Collaborated with team members following clean code and software engineering best practices.

PROJECTS

AI-Powered Fitness Tracker

- Developed an advanced fitness tracking system using Laravel 12 (PHP 8.2), MongoDB, and Node.js integration.
- Built dynamic RESTful APIs with Swagger-based API documentation to power real-time motion data analysis and form correction features.
- Implemented multi-disciplinary backend architecture with robust authentication and state-tracking microservices.
- Used Redis for caching frequently accessed data to improve response times.

Full-Stack E-Commerce Platform

- Architected a complete commercial web application simulating real-world e-commerce logic using PHP and MySQL.
- Designed complex shopping cart mechanics, order generation, and secure session-based checkout validation.
- Developed advanced relational database models to handle user transactions, dynamic filtering, and pricing histories securely.

Meister Fit Project

- Developed secure RESTful APIs using the Laravel framework, with endpoints documented for easy client integration.
- Designed and managed relational MySQL database schemas for seamless data flow.
- Implemented robust authentication and authorization systems, with unit tests (PHPUnit) covering key endpoints.
- Used Postman for API testing and Git/GitHub for version control and team collaboration.

TECHNICAL SKILLS

Languages: PHP, Python, SQL, JavaScript

Frameworks: Laravel

Databases: MySQL, SQL Server, MongoDB, Redis

Tools: Git, GitHub, Postman, Composer

Concepts: RESTful APIs, API Documentation (Swagger), Unit Testing (PHPUnit), OOP, MVC, Authentication, Database Design

CORE SKILLS

Problem Solving, Communication, Teamwork, Leadership, Critical Thinking, Organizational Skills, Attention to Detail, Adaptability.

COURSES

- Backend Web Development Diploma – Createivo (Jan 2025)
- Full Stack Web Development Diploma – Createivo (May 2025)
- Database Fundamentals – ITI Mahara-Tech (Jul 2026)
- Building Web Applications using PHP & MySQL – ITI Mahara-Tech (Jul 2026)
- Transact-SQL Queries Using SQL Server – ITI Mahara-Tech (Jul 2026)
- Implementing and Developing SQL Server Objects – ITI Mahara-Tech (Jul 2026)

LANGUAGES

Arabic: Native | **English:** B1 (Intermediate)
